

## Proxy Long/Short Energy SEK

*Proxy Long/Short Energy is an actively managed AIF fund, with low net exposure, that seeks long-term appreciation through investments in public equities of companies related to oil, natural gas and renewable energy.*

*The investment model is based on a thematic fundamental approach, supported by quantitative and systematic models. The decision making driver is the portfolio manager's fundamental understanding of the commodity and energy markets. Macro, political, geographical and technological considerations in combination with the price structure of various energy commodities, create different themes that guide the investment decisions. Companies are then analyzed in order to find investment targets for any given theme.*

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Total
